ABOUT ME

Hi, I'm Luba and I'm a front-end developer with more than 2 years of production experience and good knowledge in creation SPA.

I'm self-disciplined and adaptable, attentive to details, good team player with perfect communication skills. My responsibility is to ensure that the visual and interactive aspects of a website or application are user-friendly, aesthetically pleasing, and functionally efficient.

Currently I am seeking a front-end dev position within a company with a modern approach to development and a collaborative team that will help me to improve my skills and abilities in the IT field to ensure company's success.

I am interested in project work and full-time remote employment.

I see myself as a full-stack developer in the near future and therefore strive to expand my competence and to eventually study Node.js.

In my free time I enjoy studying new technologies, programming tutorials, solving tasks on Codewars, improving English language skills and playing guitar.
